

ENVIRONMENT POLICY

BLV is committed to understanding and minimizing the environmental impacts of their operation's activities, products and services. Environmental objectives and targets will be set within a framework to take action to prevent pollution. BLV will continually improve the environmental management system to enhance environmental performance and initiate projects and activities that will reduce impacts on the environment. Employees will be provided the knowledge, understanding and empowerment to contribute to the environmental performance of the site. BLV will comply with all applicable environmental laws and regulations and will take into consideration the needs and expectations of its stakeholders.

BLV Group is committed to:

- Being an environmentally responsible neighbor in the community we operate in, and correct incidents or conditions that endanger health, safety, or the environment;*
- Ensuring the responsible use of energy and water throughout our business, including conserving and improving energy and water efficiency;*
- Limiting noise and dust in and around the site by monitoring and using best management practices;*
- Progressively reclaim and provide protection and enhancement to biodiversity on-site.*
